FENTANYL DEFENDER

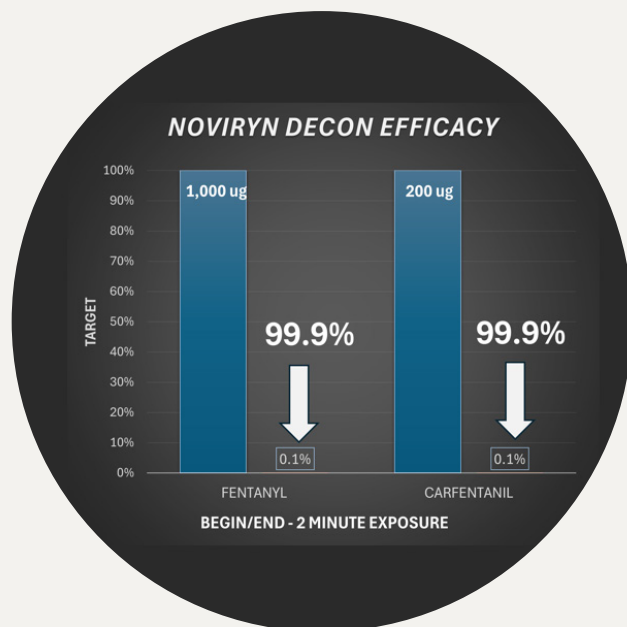

ADVANCED PROTECTION

Advanced Professional
Protection
*against Fentanyl and
Carfentanil*

Independent Test Data

The formulation has been confirmed as extremely effective (>99.9% in two minutes) in neutralizing fentanyl and carfentanil in independent laboratory testing. The formulation can reduce toxic levels of fentanyl and carfentanil to a non-toxic state in a rapid manner.

Problem

Fentanyl and carfentanil are potent opioids, posing a significant exposure risk to first responders. Dosages in micrograms (less than a grain of sand) can result in significant toxic responses.

Solution

Fentanyl Defender is a unique application that provides a safe and effective means to mitigate the risk of fentanyl and carfentanil exposure with a portable, individual-sized package configuration. The formulation is also effective against other toxic contaminants.

Effective

The formulation has been independently tested and shown to be highly effective (>99.9% in 2 minutes) against fentanyl and carfentanil. The formulation is also effective on pepper spray.

Safe

Designed with Generally Recognized as Safe (GRAS) components, it is a FDA regulated product. The formulation can be applied directly to cleanse the skin unlike bleach or other harsh chemicals.

Our **Passionate Team** is dedicated to providing exceptional solutions to challenging toxic scenarios. With decades of technical experience in the industry, including live chemical agent training, military service, and law enforcement backgrounds, we have honed the formulation and perfected the delivery mechanisms to deliver top-notch products that meet and exceed expectations.

Noviryn's staff has 35+ years of experience in governmental contracting, sales, and regulatory compliance, as well as working directly for the government. Past projects include direct sales in providing products and services to hospitals, fire departments, police, airports, and all military branches.
